                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ò
                                                                                                        AAT12704-T12709 and AAT12961-T12974 represent hepatitis C virus (HCV) El and E2 protein coding sequence constructs. These sequences are included in vectors for the production of recombinant E1, E2, and E1/E2 proteins. C The recombinant proteins can then be isolated using a method of the invention. In the method, the envelope proteins are purified by c arrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage, or a reduction step with a constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detection of HCV for vaccinating humans against HCV, for in vitro detecting one or antibodies in a sample, and in a serotyping assay for detecting one or constructs can also be immobilised on a solid substrate and incorporated constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed E1, E2 and E1/E2, and eliminates contaminating proteins. Antigens isolated using this method are not an antibut human sera than those isolated by known
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  CAGGACTGCAATTGCTCAATCTATCCCGGCCACATAACGGGTCACCGTATGGCTTGGGAT 540

The present invention relates to new therapeutic vaccine compositions for inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HVV single or specific oligomeric recombinant envelope proteins selected from an El and an E2 protein, and optionally a pharmaceutical adjuvant. The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV. The recombinant HCV singles or for immunising humans vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising antibodies, in the preparation of medicament, and for this virto monitoring of HCV disease or prognosing the response to treatment of patients suffering from HCV infection. The present sequence is a coding sequence described in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             CIGGAGGACGCCGIGAACTAIGCAACAGGGAATTIGCCCGGTIGCTCTITCTCTATCTIC 180

invention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage, or a reduction step with a disulphide bond cleavage agent, after lysis of recombinant host cells. The constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detection of HCV antibodies in a sample, and in a serctyping assay for detecting one or more serological types of HCV present in a biological sample. The constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed E1, E2 and E1/E2, and eliminates contaminating proteins. Antigens isolated using this method are more reactive with human sera than those isolated by known

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The present invention relates to new therapeutic vaccine compositions for inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HCV single or specific oligometic recombinant envelope proteins selected from an El and an E2 protein, and optionally a pharmaceutical adjuvant. The vaccines useful for inducing HCV-specific antibodies or for immunising humans against HCV The recombinant HCV El and/or E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising antibodies, in the preparation of medicament, and for the view monitoring of HCV disease or prognosing the response to treatment of patients suffering from HCV infection. The present sequence is a coding sequence described in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CTCTTGGCTTTTGCTGTCCTTGACCGTTCCAGCTTCCGCTTATGAAGTGCGCAACGTG 240

AATI2704-T12709 and AATI2961-T12974 represent hepatitis C virus (HCV) E1 cand E2 protein coding sequence constructs. These sequences are included in vectors for the production of recombinant E1, E2, and E1/E2 proteins. C in vectors for the production of recombinant E1, E2, and E1/E2 proteins. C invention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage, or a reduction step with a constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detection of HCV c antibodies in a sample, and in a serotyping assay for detecting one or antibodies in a sample, and in a serotyping assay for detecting one or constructs can also be immobilised on a solid substrate and incorporated constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed E1, E2 and E1/E2, and eliminates contaminating proteins. Antigens isolated using this method are mer reactive with human sera than those isolated by known

inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HCV single or specific oligomeric recombinant envelope proteins selected from an El and an E2 protein, and optionally a pharmaceutical adjuvant. The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV The recombinant HCV E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising ontibodies, in the preparation of medicament, and for in vitro monitoring of HCV disease or prognosing the response to treatment of patients suffering from HCV infection. The present sequence is a coding sequence described in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             480

The present invention relates to new therapeutic vaccine compositions for inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HCV single or specific oligomeric recombinant envelope proteins selected from an El and an E2 protein, and optionally a pharmaceutical adjuvant. The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV. The recombinant HCV El and/or E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising antibodies, in the preparation of medicament, and for

These sequences are included in vectors for the production of recombinant El, E2, and El/E2 proteins. Cc in vectors for the production of recombinant El, E2, and El/E2 proteins. Cc The recombinant proteins are purified by a carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage agent, after 1ysis of recombinant host cells. The constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detecting one or antibodies in a sample, and in a serotyping assay for detecting one or constructs can also be immobilised on a solid substrate and incorporated constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed El, E2 and El/E2, and eliminates contaminating proteins. Antigens isolated using this method are mentod preserved by known are reactive with human sera than those isolated by known
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                o;

AAT12704-T12709 and AAT12961-T12974 represent hepatitis C virus (HCV) El and E2 protein coding sequence constructs. These sequences are included in vectors for the production of recombinant El, E2, and El/E2 proteins. The recombinant proteins can then be isolated using a method of the construct.

The recombinant proteins can then be isolated using a method of the invention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage agent, after lysis of recombinant host cells. The constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in virto detection of HCV antibodies in a sample, and in a serotyping assay for detecting one or more serological types of HCV present in a biological sample. The constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed El, E2 and El/E2, and eliminates contaminating proteins. Antigens isolated by known
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      300

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       The present invention relates to new therapeutic vaccine compositions for inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HCV single or specific oligomeric recombinant envelope proteins selected from an El and specific oligomeric recombinant proteins selected from an El and servicein, and optionally a pharmaceutical adjuvant. The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV. The recombinant HCV El and/or E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising antibodies, in the preparation of medicament, and for in vitro monitoring of HCV disease or prognosing the response to treatment of patients suffering from HCV infection. The present sequence is a coding sequence described in the exemplification of the invention.

                                                                                                                 RESULT 12
                                                                                                                               AAT12973
                                                                                                                                          셤
                                                   ò
                                                                                                                                                                         The present invention relates to new therapeutic vaccine compositions for inducing hepatitis C virus (HCV)-specific antibodies, comprising a composition containing at least one purified recombinant HCV single or specific oligomeric recombinant envelope proteins selected from an El and an E2 protein, and optionally a pharmaceutical adjuvant. The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV. The recombinant HCV El and/or E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody tests, for raising antibodies, in the preparation of medicament, and for in vitro monitoring of HCV disease or prognosing the response to treatment of patients sufféring from HCV infection. The present sequence is a coding sequence described in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 438

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                AAT12704-T12709 and AAT12961-T12974 represent hepatitis C virus (HCV) El and E2 protein coding sequence constructs. These sequences are included in vectors for the production of recombinant El, E2, and El/E2 proteins. The recombinant El, E3, and El/E2 proteins. The recombinant proteins can then be isolated using a method of the invention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage, or a reduction step with a disulphide bond cleavage agent, after lysis of recombinant host cells. The constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detection of HCV encloades in a sample, and in a serotyping assay for detecting one or more serological types of HCV present in a biological sample. The constructs can also be immobilised on a solid substrate and incorporated
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    HCV; E1; E2; disulphide bond cleavage; envelope protein; vaccine; human; serotype; reversed phase hybridisation assay; genotype; antigen; sera;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         conformation of the recombinantly expressed E1, E2 and E1/E2, and eliminates contaminating proteins. Antigens isolated using this method are more reactive with human sera than those isolated by known

ANTI2704-T12709 and AATI2961-T12974 represent hepatitis C virus (HCV) El and El Zoretin coding sequence constructs. These sequences are included in vectors for the production of recombinant El, E2, and El, E2 proteins. The recombinant proteins and then be isolated using a method of the cinvention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage or a reduction step with a carrying out a disulphide bond cleavage or a reduction step with a carrying out a disulphide bond cleavage agent, after lysis of recombinant host cells. The constructs containing the purified HCV envelope proteins can be used to antibodies in a sample, and in a serotyping assay for detecting one or antibodies in a sample, and in a serotyping assay for detecting one or constructs can also be immobilised on a solid substrate and incorporated constructs can also be immobilisation method preserves the conformation of the recombinantly expressed El, E2 and El/E2, and conformation of the recombinantly expressed El, E2 and El/E2, and conformation of the recombinantly expressed El, E2 and El/E2, and conformation more reactive with human sera than those isolated by known
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            894

The vaccines are useful for inducing HCV-specific antibodies or for immunising humans against HCV. The recombinant HCV B1 and/or E2 proteins are useful as vaccines or therapeutics, in HCV screening and confirmatory antibody in vitro monitoring of HCV disease or prognosing the response to treatment of patients suffering from HCV infection. The present sequence

Purifying recombinant hepatitis C virus (HCV) El and E2 envelope proteins - in presence of di:sulphide bond cleavage agent, to produce proteins suitable for direct use in vaccines or diagnostic WPI; 1996-129401/13 assays of

Claim 23; Fig 21; 146pp; English.

AAT12704-T12709 and AAT12961-T12974 represent hepatitis C virus (HCV) E1 and E2 protein coding sequence constructs. These sequences are included in vectors for the production of recombinant E1, E2, and E1/E2 proteins. C in vectors for the production of recombinant E1, E2, and E1/E2 proteins. C invention. In the method, the envelope proteins are purified by carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage, or a reduction step with a carrying out a disulphide bond cleavage, or a reduction step with a constructs containing the purified HCV envelope proteins can be used for vaccinating humans against HCV, for in vitro detection of HCV antibodies in a sample, and in a serotyping assay for detecting one or constructs can also be immobilised on a solid substrate and incorporated constructs can also be immobilised on a solid substrate and incorporated into a reversed phase hybridisation assay for determining the presence or the genotype of HCV. The new purification method preserves the conformation of the recombinantly expressed E1, E2 and E1/E2, and eliminates contaminating proteins. Antigens isolated using this method are merced for a meaning the number of the number of the human sera than those isolated by known

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           230                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            341
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            101                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps
Lambda Zap II Chlamydomonas reinhardtii cDNA, mRNA sequence. XhoI; Stress condition II library, constructed by John
Davies and Jeffrey McDermott, combines cDNAs from CC-1690
cells grown to mid-log phase in TAP (MH4 - containing)
and shifted to TAP - NO3- (24hrs); H2 production
conditions (0, 12hr, 24hr) see Melis et al., (2000) Plant
Phys. 122: 127-135; TAP + H2O2 (1, 12, 24 hr); TAP +
sorbitol (1, 2, 6, 24 hr); TAP + Cd (1, 2, 6, 24 hr)
PolyA mRNA was purified from each sample, pooled and cDNA
synthesized The cDNA was directionally cloned into lambda
Zap II (Stratagene) in the EcoRI (5) and XhoRI (3)
sites. pBluescript II SK- plasmids were excised from the
lambda ZAP clones by superinfection with ExAssist
(Stratagene) phage. The library was normalized using
method 4 described in Bonaldo et al., (1996) Genome
Research 6: 791-806."
